## **Todd William Erickson**

## **EDUCATION**

EDUCA	ATION
University of Southern California, Los Angeles, CA	
•	Expected December 2020
University of Southern California, Los Angeles, CA	
MS, Aerospace Engineering, GPA 3.40	May 2011
University of Southern California, Los Angeles, CA	
BS, Mechanical Engineering, Cum Laude, GPA 3.58	May 2010
ACADEMIC EXPERIENCE AND COURSEWORK -	- COMPUTER SCIENCE (FULL TIME STUDENT)
Directed Research: <u>Unified Code Count (UCC)</u> -Java	Spring 2020
Projects: Investigate and implemented GitLab's CI/CD for a Java pro	
Foundations of Artificial Intelligence	·
<u>Coursework</u> : Search, constraint satisfaction, logic, knowledge repre	
under uncertainty, probabilistic decision making, reasoning over tin	=
Projects: Implemented a search agent using BFS, UCS, and A* in a n	- · · · · · · · · · · · · · · · · · · ·
Go playing agent implementing Monte Carlo and Minimax search w	
classify hand-written digits (0-9) from the MNIST database using so	
Web Technologies	· ·
Coursework: HTML, CSS, HTTP, HTTP/2, Web Servers, Javascript, Ar	
privacy tools, Mobile web technologies (Android and iOS), Cloud co	
Projects: Simple Web Page Using CSS   JSON File Parser (enter build	•
Javascript, CSS, HTML, and a Flask & Python back-end to make REST	
React.js/React-Bootstrap front-end and a separate Node.js back-en	
Analysis of Algorithms  Coursewarks Analysis and design of greads, divide and conguer due	
<u>Coursework</u> : Analysis and design of greedy, divide and conquer, dynalgorithms. Asymptotic notation and time complexity analysis. NP-c	
Database Systems	•
<u>Coursework</u> : Data modeling, relational models, ER/EER diagrams, Si	
DBs, NoSQL, big data, MapReduce, data science, data mining, mach	
Projects: Created and queried a database in PostgreSQL V12.   Crea	
including convex hull, and visualized using Google Earth using a kml	
Gremlin.   Using Google Colab with a Jupyter Notebook, trained a r	
Operating Systems	
Coursework: OS History, threads, scheduling, I/O, storage allocation	
file systems, virtual memory, directories and naming, file system joi	
Projects: In Ubuntu 16.04 32bit in C: Created a circular doubly linke	
based traffic-shaper   Implemented much of the functionality of th	•
Introduction to Computer Networks	
Coursework: IP and physical addressing, OSI model, routing, socket	programming, networking protocols, networking security.
Projects: In Ubuntu 16.04 32bit, created a TCP and UDP socket netw	
Introduction to Programming Systems Design - Does not count to	toward GPA - Letter Grade: A Spring 2019
Coursework: Programming and software design fundamentals, Big-	O algorithm analysis, Unix/Linux, Java, C++.
Projects: Java - Coin toss simulator with result statistics GUI   Bulga	rian solitaire solver from user input starting conditions   GUI
based minesweeper   Scrabble word score calculator from a set of	letters   C++ - Created a hash table used for organizing student
grades and for creating a word concordance from text files   Create	ed singly linked list assessment and modification functions.
PROFESSIONA	L EXPERIENCE
Boeing Commercial Airplanes, Propulsion Engineer, Fue	el Systems Center of Excellence 2010-2020
Propulsion Engineer III2017-2020	Propulsion Engineer II2013-2017
Propulsion Engineer I2011-2013	Propulsion Engineering InternSummer 2010
• 2018 Product Development Grand Challenges, Step change inno	ovation for a future small aircraft (FSA)2018
Gathered and led a team for the application of novel technologies t	
further development.   Developed net present values, risks, potent	ial mitigations, and future development plans.
Created updated tubing object and tubing object creation classes	es for use with updated interpreter2018
Using object inheritance, abstract classes, heterogeneous arrays, de	ependent properties, and events/listeners, created updated
MATIAP classes for tubing elements and tubing runs and their resp	estive creation and modification

MATLAB classes for tubing elements and tubing runs and their respective creation and modification.

• Improvement of ISO 10303-21 STEP File (.stp) interpreter for generating MATLAB tubing	g geometry	2017
Researched and documented the ISO STEP file standards to understand STEP file structure a	and created in-house	e documentation.
Modified existing function-based interpreter to be class-based and to identify and capture p	previously missed ge	eometry.
• KC-46 aerial refueling system surge pressure model development with Simulink/Simsca	pe	2017
• Risk reduction of 777X fuel tank flammability reduction system (FRS) Monte Carlo mode	el	2017
KC-46 aerial refueling system surge pressure model risk reduction with Simulink/Simsca		
Used to enable certification. Optimized model to greatly improve the run time (5 min vs 60	•	
• Evaluation of flight dynamics effects on fuel tank flammability reduction system (FRS) u		
<ul> <li>Analysis and documentation of the vapor to liquid ratio (V/L) present in aircraft's fuel s</li> </ul>	=	<del>-</del>
Presented on the solubility of gases in aviation fuels to the Coordinating Research Council, I	-	
Solubility and V/L tool using HTML, CSS, JavaScript, and jQuery for use by internal customer		
unit testing   Authored the updated section on air solubility in jet fuels in the CRC Handboo		
• Evaluate Simulink/Simscape for analysis of fuel system transients (surge pressure)
